

MEDIA RELEASE

ASI To Offer Non-Profits SOA Web Services

New Web-Based Interface Enables Customers and Partners to Integrate Third-Party Applications into iMIS

Melbourne, 11th August 2010 Advanced Solutions International (ASI), the largest, privately-owned global provider of web-based software for member and donor-based non-profits, today announced the availability of *iMIS* 15.1.3. The latest evolution of *iMIS* features a Service Orientated Architecture (SOA) Web Services Application Programming Interface (API).

This new universal, web-based API allows customers and partners to easily integrate third-party applications into *iMIS*, regardless of technology or application platform, without affecting the product upgrade path. Developer documentation for *iMIS* SOA Web Services is available in the SDK Center of the *iMIS* Developer's Community.

"This enhancement to the *iMIS* platform builds on our tradition of openness," said Paul Ramsbottom, managing director, ASI Asia-Pacific. "There are hundreds of add-on applications currently available for *iMIS*, and we are committed to providing our customers and partners in Australia and the rest of the Asia-Pacific region with the very latest tools they need to develop even more."

iMIS 15.1.3 includes expanded support for an array of new operating systems and web applications, including SQL Server 2008 and 2008 Tools, Windows 7, Crystal Reports on 64-bit, ColdFusion 9 and Internet Explorer 8. In addition, *iMIS* 15.1.3 comes with new web content management features, including support for a new design template based on Universal Design concepts, which makes it easy to transform web content for use in mobile devices.

iMIS is used by more than 280 non-profit organisations in the Asia Pacific region including Cancer Council Victoria, National Breast Cancer Foundation, The Royal Australasian College of Surgeons, The Royal Australian College Of General Practitioners, Professional Golfers Association of Australia, Surf Life Saving Foundation and The Tax Practitioners Board.
